

SHOVAN NANDI

Senior Laravel Engineer | AWS Cloud Infrastructure

Kolkata, West Bengal, India | +91 83483 38409 | shovannandi95@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

Backend engineer with 8 years of professional experience, including 7 years building secure, scalable systems with PHP 8, Laravel, Livewire, and Filament, and 2.7 years designing and operating production cloud infrastructure on AWS. Provisioned and managed EC2, S3, RDS, Elastic Load Balancer, ElastiCache, and Route 53 to run high-traffic, multi-tenant applications, including a 16-site community platform built entirely on AWS. Built and maintained CI/CD pipelines with GitHub Actions for reliable, repeatable deployments, and managed application secrets and environment configuration for production systems. Delivered end-to-end integrations with payment gateways, SMS gateways, and CRM platforms (GoHighLevel, Zoho), and deployed Laravel and Node.js applications on Railway with Cloudflare R2 object storage. Serves as the primary technical point of contact for enterprise clients, owning project lifecycles from scoping through production release.

CORE SKILLS

Backend & API Development: PHP 8.x, Laravel (MVC, HMVC), Livewire, Filament, Codelgniter, RESTful API design for Android/iOS, third-party API integration

Cloud Infrastructure: AWS (EC2, S3, RDS, Elastic Load Balancer, ElastiCache, Route 53, IAM), Digital Ocean (Droplets, Managed Databases, Spaces), Railway (app hosting/deployment with Cloudflare R2)

CI/CD & Version Control: GitHub Actions (pipeline design, build/test/deploy automation), Git, GitHub

Infrastructure & Storage: Multi-server cloud architecture, object storage (S3, DO Spaces, Cloudflare R2), load balancing, DNS management (Route 53)

Databases: MySQL, PostgreSQL — schema design, query optimization

Integrations: Payment gateways, SMS gateways, CRM platforms (GoHighLevel, Zoho), webhook-based data sync

Scripting & Automation: Bash, PHP-based automation scripts for deployment tasks

AI-Assisted Workflows: Claude, Antigravity, Gemini — used daily for planning, development, debugging, and code review

PROFESSIONAL EXPERIENCE

Senior Associate, Projects — Notebrains, Kolkata - Nov 2023 – Present

- Serve as sole technical point of contact for enterprise clients, directing 5+ concurrent Laravel/Filament projects from scoping through deployment, including cloud infrastructure setup and third-party API/CRM integrations.
- Architected and maintain CI/CD pipelines in GitHub Actions, automating build, test, and release workflows across client projects to enable reliable, repeatable deployments.
- Own the full project lifecycle — requirements scoping, development, QA, UAT, and production release — sustaining on-time delivery across all active accounts.
- Coordinate cross-functional development, QA, and design teams and manage account-level client relationships, improving delivery predictability and client retention.
- Integrate AI-assisted development tools (Claude, Antigravity, Gemini) into daily workflows to accelerate feature development, debugging, and code review.
- Authored and published two open-source Filament plugins (Menu Manager, Email Templates Management), both listed in the official Filament plugins directory, driving external adoption via Packagist.

Web Developer — OMM Software Innovation, Pune - Feb 2022 – Sept 2023

- Integrated payment gateway and SMS gateway APIs across multiple client platforms, enabling automated transaction processing and customer notifications.
- Designed and built custom admin dashboards in Laravel and MySQL for multiple enterprise clients, streamlining internal reporting and data management workflows.

Web Developer — Mridaya IT Services, Kolkata - Feb 2020 – July 2021

- Developed reusable backend components and RESTful APIs, reducing duplicate development effort across projects.
- Built and maintained scalable multi-tenant platforms using modular HMVC architecture in Laravel, supporting multiple client instances from a shared codebase.

Splunk Developer — Trivid Technology Services, Kolkata - Aug 2019 – Feb 2020

- Built log management and monitoring dashboards in Splunk, improving visibility into system performance and operational issues.

Web Developer — Fusion Techlab, Kolkata - Jan 2019 – July 2019

- Developed and maintained PHP/Laravel web applications for client projects, contributing to backend feature development and bug fixes.

Web Developer — RL Infocomm Pvt. Ltd., Durgapur - July 2018 – Dec 2018

- Started career building PHP-based web applications, gaining foundational experience in backend development and database design.

KEY CLOUD INFRASTRUCTURE PROJECTS (2.7 YEARS DEVOPS EXPERIENCE)

Business World — 16-Site Community Web Platform

- Designed and built complete cloud infrastructure on AWS for a network of 16 community websites, spanning compute, database, storage, caching, and DNS layers.
- Provisioned and managed EC2 instances, Elastic Load Balancer for traffic distribution, RDS for relational data, S3 for static/object storage, ElastiCache for application caching, and Route 53 for DNS.

Rallyup

- Deployed and managed application infrastructure on Digital Ocean, including compute instances (Droplets), a managed RDS-equivalent database, and Spaces object storage.

Global Sports Network

- Set up and maintained AWS infrastructure using EC2 for compute and S3 for object/static storage.

OPEN-SOURCE CONTRIBUTIONS & ACHIEVEMENTS

- Menu Manager — Published on Packagist and listed in the official Filament plugins directory:
www.filamentphp.com/plugins/notebrainslab-menu-manager
- Email Templates Management — Published on Packagist and listed in the official Filament plugins directory:
www.filamentphp.com/plugins/notebrainslab-email-templates-management

EDUCATION

- B.Tech in Computer Science — Mallabhum Institute of Technology, Bankura, West Bengal (2014 – 2018)
- Higher Secondary — Samanta Khanda HK Roy High School, Hooghly, West Bengal (2012 – 2014)
- Secondary — Khatul Shiba Durga High School, Hooghly, West Bengal (2011 – 2012)
